

Benefits

- ♦ Optimizes patient length-of-stay and bed utilization
- ♦ Improves hospital facility utilization as well as delivery of patient care
- ♦ Automates, simplifies and streamlines the patient placement and discharge process
- ♦ Reduces overhead costs and paper management more than 80%

Inscribe's rules-based electronic forms, intelligent routing and transaction management features automatically notify the selected providers by fax, email or SMS text message. Providers are able to accept the patient referrals online in seconds. It unifies electronic and fax communications into a simplified electronic process that eliminates paper, reduces patient placement time for discharge planners and simplifies management and reporting to improve hospital discharge planning in record time. Inscribe Hospital Discharge complies with HIPAA and CMS regulations but also utilizes the AuthentiProof™ time-date seal to authenticate all records and audit trails for totally indisputable records.

About Us

Authentidate Holding Corp. (Authentidate®) is a provider of secure health information exchange, workflow management services and telehealth solutions. The company's software and web-based services enable healthcare organizations and other enterprises to increase revenues, reduce costs and enhance patient care by eliminating paper and manual work steps from clinical and administrative processes. The web-based services are delivered as Software as a Service (SaaS), and only require that customers have an Internet connection and web browser. The company's healthcare customers and users include leading homecare companies, health systems and physician groups. These organizations utilize the company's products and services to coordinate care for patients outside of acute-care.

Authentidate is committed to providing secure, trusted, innovative technologies and partnering with customers to help them solve their business challenges.

Hospital Discharge

Inscribe® Hospital Discharge

Inscribe® Hospital Discharge secure web-based solution automates your hospital discharge planning process. It improves your hospital facility utilization by optimizing patient length-of-stay and bed turnover.

Finding the perfect fit for your patient's specific care at a short or long-term care facility, home nursing care provider or other Accountable Care Organization (ACO) can be reduced to a few minutes of online entry. The time discharge planners, case managers and social workers normally spend on phone and fax tag with potential providers in the discharge planning process is virtually eliminated. You get responses very rapidly because Inscribe Discharge can notify providers by fax, email and/or SMS text message, so they know that a discharge from a hospital is waiting for their response.

Features

- ♦ Defined workflows for hospital discharge referrals and acceptance
- ♦ Automates notifications to care facilities and home care providers
- ♦ Facilities receive status by fax, email and/or SMS text message
- ♦ Unifies electronic and fax based communications into one dashboard for hospital staff
- ♦ Provides family member facility search to participate in placement of patient

Inscribe Hospital Discharge can integrate seamlessly with your hospital Electronic Medical Health Record (EMR/EHR) system, Accountable Care Organization (ACO) information system, Computer Patient Record System (CPRS) or other electronic patient record system resulting in a more efficient and cost effective discharge planning process.

Inscribe Hospital Discharge is an easy to use program that requires little to no training. Most users notice the benefits within an hour!
